# Forest and Garden Products

Equipment and services for people enjoying outdoor work

**Enhance your garden  
experience with cutting edge  
performance and perfection**

CELEBRATING  
50 YEARS  
IN IRELAND

Husqvarna tools for forests, parks and gardens are born from a unique relationship between man, machine and nature – between our company and the people who use our equipment to shape nature every day. Dedicated people, who need the very best tools and machines to achieve the very best results.

When the going gets tough, Husqvarna tools are tougher. When work gets hard, they're lighter, more comfortable to handle and easier to use. Yet they always affect your surroundings as little as possible when it comes to noise and pollution. Our job is to make you better and make sure you get the job done – smarter, easier and more efficient and safe than ever.

# Husqvarna Automower® advantages:

- 1 Covers all areas**  
The patented guide wire makes sure that your robotic mower reaches remote work areas. It also helps it find the shortest way back to the charging station, saving energy and avoiding visible tracks.
- 2 Manages narrow spaces**  
The Automower® robotic mower senses narrow passages and finds its way through narrow gaps.
- 3 Works in the rain**  
Automower® robotic mowers deliver great cutting results in any type of weather. Its vital parts are safely protected from rain, as well as dust and grass clippings.
- 4 Recharges automatically**  
The robotic mower finds its own way back to the charging station. It recharges for about 60 minutes, then resumes mowing — all without any effort on your part.
- 5 Operates quietly**  
You'll be surprised how quickly you forget about your robotic mower. You'll hardly notice it as it rolls around your garden doing its job quickly, quietly and efficiently.
- 6 Handles hills and slopes**  
Thanks to optimised design and intelligent behaviour, Automower®435X AWD robotic mowers can cope with slopes up to 70 % or 35°, whereas our other models easily handle inclinations of up to 50 %.

# CEORA™

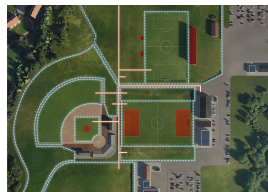

## THE FUTURE OF COMMERCIAL TURF CARE

With its huge area capacity, CEORA™ is great news for all turf care professionals. Systematic cutting and virtual boundaries deliver superb results and easier turf management on larger surfaces than ever. What's more, this low noise, emission-free\* solution offers thrilling future potential. It's time to expand your horizons and embrace the future.

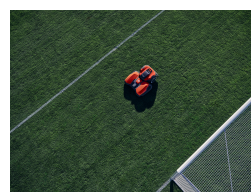

### COVERING MORE TURF THAN EVER

Up to 75,000m<sup>2</sup>

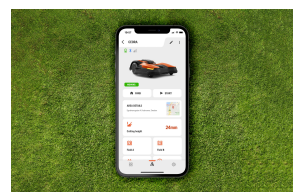

### FLEXIBLE AND HASSLE FREE ZONE MANAGEMENT

EPOS™ technology eliminates the need for boundary wires for the ultimate flexibility.

### SYSTEMATIC MOWING FOR A WINNING RESULT

Choose your cutting patterns, heights and times to achieve your perfect result.

### CONTROL AT YOUR FINGERTIPS

Complete operational control and surveillance from your smart phone.

## THE SYSTEM

### Modular system with two drive units

CEORA™ robotic mower is a modular system where you select the combination that suits your operation best. An innovative split design features a drive unit and a front unit. The 546 drive unit delivers the highest cutting performance with a total capacity of up to 75,000m<sup>2</sup>. The 544 drive unit can cut up to 60,000m<sup>2</sup>.

**Razor 43M / 43L**  
Features 15 high-speed steel blades, mounted on 3 cutting discs. Easy maintenance and handling is made possible by an ergonomic cutting deck service position.

**Charging station CS4**  
A battery charging station is required to power CEORA™. The charging station comes equipped with a transformer.

### Active wheel brushes

Available as an accessory, these work constantly to reduce grass from collecting on the wheels. Helping to create optimal turf, without any grass clumps.

### EPOS reference station

Required for all EPOS installation, this handles the signals between the product and the satellite system. The EPOS reference station is compatible with other Husqvarna EPOS robotic mowers.

## WORKING AREA CAPACITY

### UP TO 25,000 M<sup>2</sup>

#### PRO SPORTS QUALITY

Everyday care of premium sports turf or golf courses at low cutting height. A well managed, lush and dense turf can be optimally mowed with CEORA™.

### UP TO 50,000 M<sup>2</sup>

#### PRO QUALITY

For sports turf and golf courses at medium ambition level, or other facilities with high demands on turf quality. Medium turf height and normal dense quality of turf. CEORA™ to mow the area every second day.

### UP TO 75,000 M<sup>2</sup>

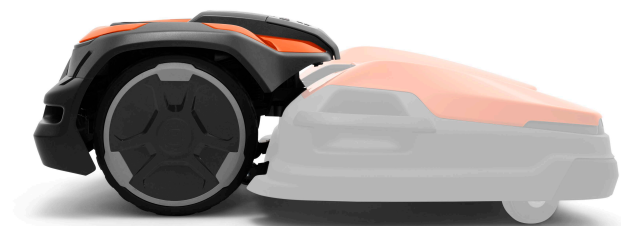

#### REGULAR QUALITY

For turf with lower demands and slower levels of growth. Higher cutting height and normal to low dense quality of turf. CEORA™ to mow the area twice per week.

## FILING EQUIPMENT

A sharp chain is as important as a powerful engine. For your chainsaw to operate effectively, safely and with precision it is vital to have a sharp chain. How often it needs to be sharpened depends on how frequently you use it. A good indication of the condition of your chain is the appearance of the wood chips. A sharp chain will produce fine wood chips, while a dull chain generates sawdust. You'll need a round file, a flat file and a filing gauge to file a chain. We also recommend that you use a stump vise to hold the bar, leaving both hands free for filing.

### FILE HANDLE

Patented file locking system. Fits all our files. 5° and 30° guides ensures correct file angling.

Item	Order PNC	Price incl. VAT
File handle - Round files Ø 45-55mm	505 69 78-01	€ 3.00
File handle - Flat file	505 69 78-10	€ 3.00

### FILING THE CUTTING TEETH

File using light and even pressure, with gentle pushing strokes, parallel to the gauge. Try to get the same length of all cutters.

### INTENSIVE ROUND CUT FILES

Designed for optimal cutting performance and longer lifetime.

Item	Order PNC	Price incl. VAT
4.0mm - 3 pack	597 35 48-01	€ 6.00
4.0mm - 12 pack	597 35 48-02	€ 23.00
4.5mm - 3 pack	597 35 55-01	€ 6.00
4.8mm - 3 pack	597 35 58-01	€ 6.00
4.8mm - 12 pack	597 35 58-02	€ 23.00
5.5mm - 3 pack	597 35 61-01	€ 4.00
5.5mm - 12 pack	597 35 61-02	€ 23.00

### FLAT FILES

Quality files which give you the right geometry of the cutter.

Item	Order PNC	Price incl. VAT
Flat files 6" - 12 pack	505 69 81-61	€ 44.00
Flat files 6" - 1 piece	505 69 81-60	€ 4.00
Flat files 8" - 1 piece	505 69 81-80	€ 6.00

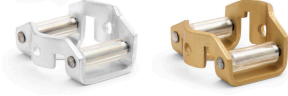

### FILING THE DEPTH GAUGE

File all the way down to the gauge. If you file the depth gauge without a tool you, risk filing them too far down and the chain will produce chips which are too thick.

## FILE GAUGES

Specifically designed file gauge that give the correct filing angles  
Use together with our round files

## + THE SMART COMBI CAN

### LEVEL WINDOW

For quick visual check of remaining fuel level.

### MECHANICAL LOCK

The spout has a mechanical lock to prevent unexpected opening and leakage.

### INTEGRATED TOOL BOX

Making it easy to bring extra tools and frequent parts.

### OVERFILL PROTECTION

The flow stops automatically when the machine's tank is full, which means you can lift the combi can without spilling fuel.

### ERGONOMIC GRIP

The handles are placed for optimal lifting ergonomics when carrying and refuelling.

### PARKING POSITION

The spouts can be rotated into a parking position to prevent damage during transportation.

## HAND SAWS

The new generation of Husqvarna saws have been ergonomically designed, to lie comfortably and safely in your hand during sawing and a stop at the end of the handle prevents you from slipping. This has proven particularly useful during pulling movements, and assists you in making smooth progress.

## FOLDABLE PRUNING SAW 200FO

With a total length of 47cm, the 200FO saw is an easy-to-use all-rounder for cutting back thicker branches. It is lightweight making it ideal for all minor sawing work in the garden, and other outdoor activities.

## PRESSURE WASHERS

### More cleaning with less water

Nature gives us everything we need – like water, which comes in handy when working around the house and garden. With our innovative pressure washers, you'll discover that water's washing performance is hard to beat. Fresh water should always be used sparingly, and Husqvarna's pressure washers use about 80 % less water to get the job done when compared to a regular hose.

# KEEP YOUR SAFETY CLOTHING SAFE

## WASHING GUIDE

Your protective clothes are regularly exposed to sweat and oil. These substances can reach the protective layer, reducing its functionality. This is why you need to wash your clothes regularly and in accordance with their labelling. If your clothes get heavily soiled, you should wash them as soon as possible after use.

Wash the garment regularly in accordance with the instructions on the inside labelling.

Machine wash. For temperature, see inside labelling.

If a repair to the outer material is being made, do not sew into the protective material as this can reduce its protective qualities.

Damaged outer material must be repaired immediately in order to prevent the protective material becoming damaged.

After washing, the garment should be stretched prior to drying. Air dry slowly.

Do not wash your protective clothes inside out. Also, do not bleach, dry clean, or tumble dry. Iron with low heat.

The garment should be scrapped and not used again if the protective material has been: damaged, incorrectly washed, or altered from its original shape.

Adhesive must not be used when carrying out repairs as it may affect the protective material and reduce its protective qualities.

Clean the garment immediately if it has been subjected to petrol, oil, grease or other flammable materials. Fire hazard!

Keep the garment away from sharp objects, acids, oils, solvents, fuels and animal droppings.

This product is no substitute for the operation of a chainsaw and does not provide total protection.

Cut-retardant apparel and materials are subject to a certain degree of aging. In professional logging, the maximum period of usage is considered to be about 12 months. In non-professional or occasional use, up to 5 years is considered acceptable.

## OILS & LUBRICANTS

### ENGINEERED TO OPTIMISE YOUR HUSQVARNA

2-stroke chainsaw engines can run at 14,000 rpm, often under heavy load. At Husqvarna we design our engines to be durable and powerful, whilst also lightweight. This places special requirements on the oil – so it's vital to choose the right one. Husqvarna 2-stroke oils that meet our strict requirements are labelled VEF – Verified Engine formula.

#### 4-STROKE OIL 10W-40

High quality engine oil for all 4-stroke garden equipment. Developed for easy starting at low temperatures, perfect lubrication at all operating conditions and low oil consumption.

#### LS+ 2-STROKE ENGINE OIL

LS+ oil is a mix of mineral and synthetic oils. Low smoke and has extremely good lubrication qualities on high load engine components, such as the connecting rod and bearings. It is best used for chainsaws and clearing saws with a cylinder volume up to 55cm<sup>3</sup>. It also lowers the engine temperature which extends engine life and gives a very good seizure protection against lean mix as well as carbon related piston seizures. VEF approved.
